

Name _____

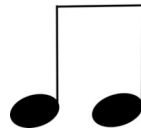

Create your own composition!

Directions: You are going to create your own composition on guitar, and perform it for the class.

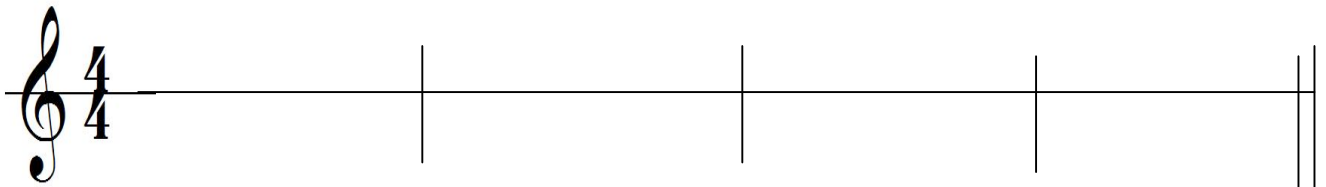

You may use the following notes for your composition:

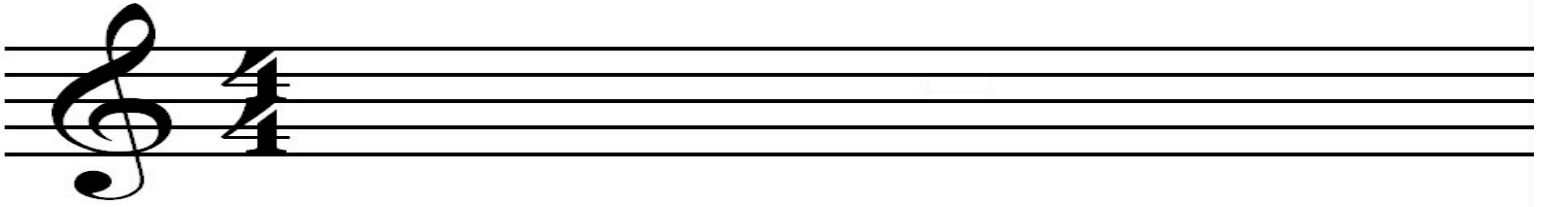

You may also use the following rhythms:

First, choose what rhythm you want to use and fill it in the staff below. Make sure it adds up to four beats per measure! When you are finished, quietly tap the rhythm on your lap.

Once you're happy with your rhythm, choose what notes you would like your composition to have. Using your original rhythm, fill them in here. Don't forget to fill in the barlines and fingerings too!

Play through your new composition. Do you like the way it sounds? Why or why not? Try making some changes to either the rhythm or the notes to see how it sounds different, and put them below.

Which version of your composition do you like more? Why? What would you consider doing differently next time?
